Subsets have a larger margin of error than the whole data set. As a rule we do not rely on the validity of very small subsets of the data, especially sets smaller than 50-75 respondents. At that size subset we can make generalizations, but in these cases the data is more qualitative than quantitative

3. Last year, Sen. Angus King opposed the president taking executive action on immigration, saying 'The Constitution...doesn't say if the president gets frustrated and Congress doesn't act, he gets to do...what he thinks is important for the country.' However, this month Senator King voted against legislation that would bar the use of federal funds to implement the president's plan to shield millions of illegal aliens from deportation and grant them work authorization. Which of the following statements best reflects your views on Sen. King's stance?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Sen. King should support legislation to defund the president's executive action on immigration.	154	47.4	47.4	47.4

4. President Obama has said that if Congress sends him a Department of Homeland Security bill that prohibits him from using funds to implement his executive action on immigration, he will veto the bill. In your opinion, would the president be justified in vetoing the Homeland Security funding bill because it limits his ability to carry out his plan to shield illegal aliens from deportation and grant them work authorization?

5. If the House and Senate cannot come to an agreement on legislation to fund the Department of Homeland Security, there is a possibility that about 15 percent of the department's operations could be shutdown. The other 85 percent of DHS personnel are considered essential workers and would remain on the job even if a spending bill is not approved. In your opinion, who would be most responsible if a partial shutdown of DHS operations were to occur?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	House Republicans who insist on including provisions preventing the president from carrying out his executive action on immigration.	70	21.6	21.6	21.6
	Senate Democrats and President Obama who insist on allowing Homeland Security funds to be used to carry out the president's executive action on immigration.	107	33.0	33.0	54.7

6. Supporters of the president's executive action on immigration argue that it would make the country more secure because it will help us identify the people who are currently living here illegally. Opponents of the president's plan argue that it would make the country less secure because it would divert resources and manpower away from the department's primary mission of securing the homeland. In your opinion, what effect would the president's executive action on immigration have on homeland security?

		Frequency	Percent	Valid Percent	Cumulative Percent
