Subsets have a larger margin of error than the whole data set. As a rule we do not rely on the validity of very small subsets of the data, especially sets smaller than 50-75 respondents. At that size subset we can make generalizations, but in these cases the data is more qualitative than quantitative

Subsets have a larger margin of error than the whole data set. As a rule we do not rely on the validity of very small subsets of the data, especially sets smaller than 50-75 respondents. At that size subset we can make generalizations, but in these cases the data is more qualitative than quantitative

Subsets have a larger margin of error than the whole data set. As a rule we do not rely on the validity of very small subsets of the data, especially sets smaller than 50-75 respondents. At that size subset we can make generalizations, but in these cases the data is more qualitative than quantitative

Zogby Analytics Online Survey of 2020 Presidential Election Voters in Pennsylvania
11/4/20 - 11/8/20 - MOE +/- 3.5 Percentage Points

6. Please tell me whether you believe immigration policies have an effect on other critical policy matters: Immigration fuels most population growth in the United States. Do you agree or disagree that immigration should be reduced in order to maintain our nation's population?
